Information to access the product

This product, catalogue no. 81-595-MIE, is available for free in electronic format. To obtain a single issue, visit our website at www.statcan.ca and select Publications.

Standards of service to the public

Statistics Canada is committed to serving its clients in a prompt, reliable and courteous manner. To this end, the Agency has developed standards of service which its employees observe in serving its clients. To obtain a copy of these service standards, please contact Statistics Canada toll free at 1-800-263-1136. The service standards are also published on www.statcan.ca under About us > Providing services to Canadians.

Statistics Canada

Acknowledgements

The Centre for Education Statistics wishes to thank the Departments of Education from each province and territory for their commitment and prompt response to this new survey. It would also like to thank Danielle Baum for her dedication in preparing reports for dissemination.

Note of appreciation

Canada owes the success of its statistical system to a long-standing partnership between Statistics Canada, the citizens of Canada, its businesses, governments and other institutions. Accurate and timely statistical information could not be produced without their continued cooperation and goodwill.

1. Enrolments

Enrolment in Canadian public elementary and secondary schools has dropped slightly since 1998/1999. Just under 5.3 million children were enrolled in public schools in the academic year 2004/2005, a decrease of 1.9% from 1998/1999.

Alberta and Ontario were the only provinces that bucked this overall trend of declining enrolments, recording an increase between 1998/1999 and 2004/2005. There were a total of 551,000 enrolments in Alberta in 2004/2005, up 1.4% from 1998/1999. In Ontario, there were 2.1 million enrolments in 2004/2005, up 0.6% from 1998/1999.

Chart 1

Percent change in enrolments (headcounts) between 1998/1999 to 2004/2005, Canada, provinces and territories

Note: Data for the N.W.T. and Nvt. are for 1999/2000 to 2004/2005.

All other provinces and territories have reported a drop in elementary/secondary school enrolment. The largest decline in student enrolment occurred in Newfoundland and Labrador where the number of students has fallen 18.5% since 1998/1999 (Chart 1 and Table 1). This is consistent with population estimates data which show that the school-age population in Newfoundland and Labrador also declined nearly 18.5% over this time period (Table 27).

This decrease is due in large part to continued migration to other parts of Canada. The number of students declined in all other provinces and territories, ranging from a drop of 10.5% in the Yukon to 1.4% in Quebec. The decline in enrolments across the country can be attributed to an aging population, as the children of the baby boomers are now starting their post-secondary education, contributing to the increased post-secondary enrolment which has been observed in recent years.

There were slightly more males than females enrolled in Canadian public schools in 2004/2005, with 51.4% of enrolments consisting of males. This ratio was generally constant over the 1998/1999 to 2004/2005 time period, across all provinces and territories in Canada, and is also consistent with population estimates of the school-age population.

2. Graduates

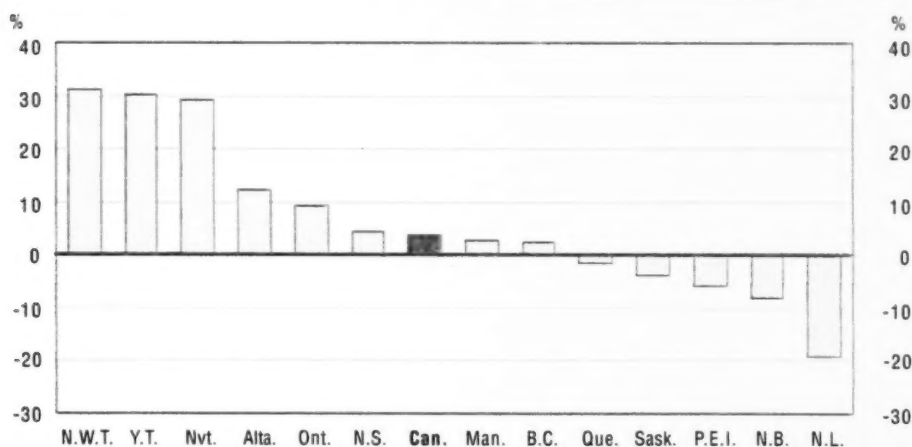

Just under 340,000 people graduated from public secondary schools in the academic year 2004/2005, up 3.7% from 1999/2000. This increase was primarily driven by the elimination of Grade 13 (OAC) in Ontario. When excluding the graduates from the Ontario double cohort, the overall number of graduates in Canada has remained virtually flat over the 1999/2000 to 2004/2005 period (0.8%). However, variations in the number of graduates were observed over this period in several provinces and territories.

Compared to 2000/2001, the number of graduates shot up 7.9% in Ontario in 2001/2002, one year before the double cohort occurred. This early increase could be a result of students that were on the verge of graduating deciding to take extra credits to graduate early, in order to start their post-secondary education before the anticipated rush brought on by the elimination of Grade 13 the following year. In 2002/2003, the year the double cohort occurred, the number of graduates spiked 23.9% compared to 2000/2001. In 2004/2005, two years after the occurrence of the double cohort, the number of graduates was still above the norm, with the number of graduates up 8.0% over 2000/2001. This may be due to some students deciding to stay longer in school to avoid the rush and to increase their marks to better compete when entering at the post secondary level.

A total of 31,800 people graduated in Alberta in 2004/2005, up 12.2% from 1999/2000. Notable increases in the number of graduates also occurred in the Northwest Territories (31.1%), the Yukon (30.2%), Nunavut (29.1%) and Nova Scotia (4.5%), from 1999/2000 to 2004/2005.

Chart 2

Percentage change in the number of graduates between 1999/2000 and 2004/2005, Canada, provinces and territories

In contrast, the largest declines in the number of graduates over the 1999/2000 to 2004/2005 period occurred in Newfoundland and Labrador (19.2%), New Brunswick (8.0%) and in Prince Edward Island (5.7%) (Chart 2 and Table 7). The decline in Newfoundland and Labrador was consistent with a drop in school enrolment, the result of out-migration to other provinces or territories (Chart 1 and Table 1). A portion of this decline is likely due to the introduction of provincial examinations in 2000/2001.

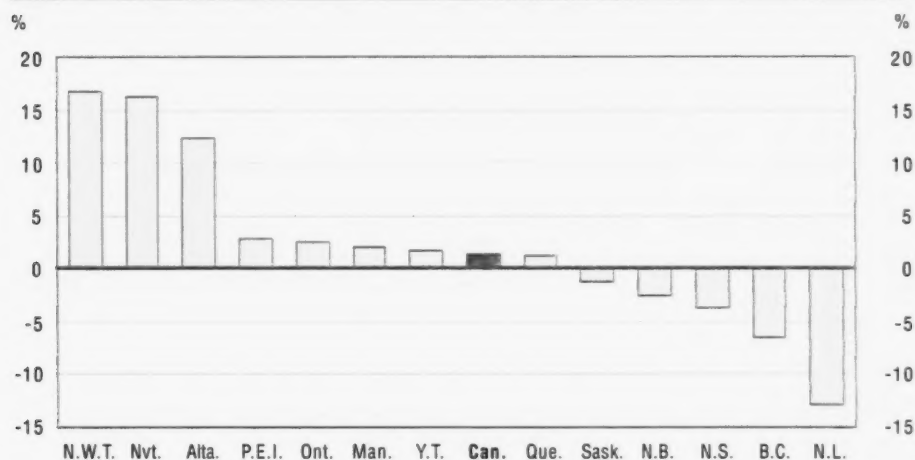

3. Educators

There were slightly under 310,000 educators¹ in Canadian public schools in 2004/2005, an increase of 1.3% from seven years earlier. Compared with 1998/1999, a total of eight jurisdictions had an increase in educators since 1998/1999 versus five that had a decrease. This figure fluctuated widely during this 7 year period (Table 9).

Between 1998/1999 and 2004/2005, the number of educators based on full-time equivalents varied by less than 7% in all jurisdictions, except four – Alberta, the Northwest Territories, Nunavut and Newfoundland and Labrador (Chart 3 and Table 9). The number of educators increased by 12.3% in Alberta, by 16.7% in the Northwest Territories (since 1999/2000), by 16.2% in Nunavut and fell by 12.8% in Newfoundland and Labrador.

Chart 3

Percentage change in the number of educators (full-time equivalent) between 1998/1999 and 2004/2005, Canada, provinces and territories

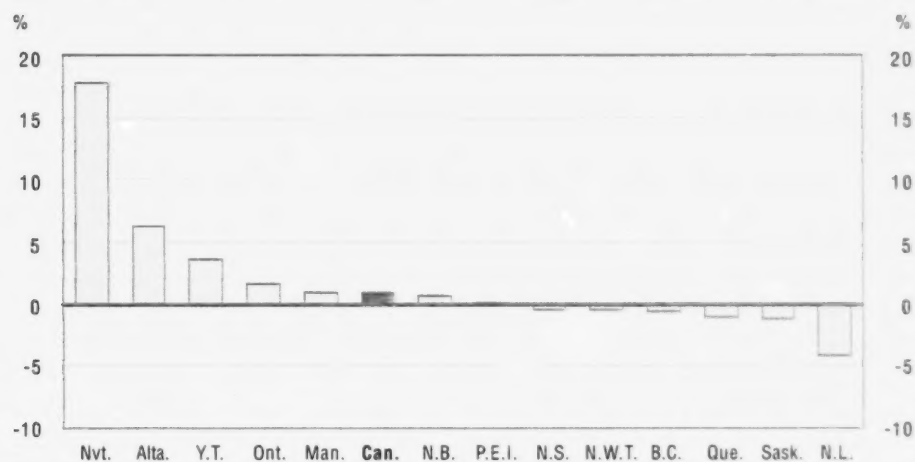

Note: Data for the N.W.T. and Nvt. are for 1999/2000 to 2004/2005.

Newfoundland and Labrador is the only jurisdiction where the number of educators has decreased each year since 1998/1999. In Prince Edward Island, the number of educators has been increasing since 1998/1999. The numbers of educators in British Columbia have been declining since 2001/2002 (Table 9).

Between 2003/2004 and 2004/2005, the number of educators, based on full-time equivalents, varied by 1% or less in seven jurisdictions. A slightly more significant variation was observed in six jurisdictions; Newfoundland and Labrador, Ontario, Saskatchewan, Alberta, Yukon and Nunavut. The number of educators decreased by 4.1% in Newfoundland and Labrador and by 1.2% in Saskatchewan, increased by 1.6% in Ontario, 6.3% in Alberta, 3.6% in the Yukon and 17.8% in Nunavut (Chart 4, Table 9).

Chart 4

Percentage change in the number of educators (full-time equivalent) between 2003/2004 and 2004/2005, Canada, provinces and territories

4. Student-educator ratio

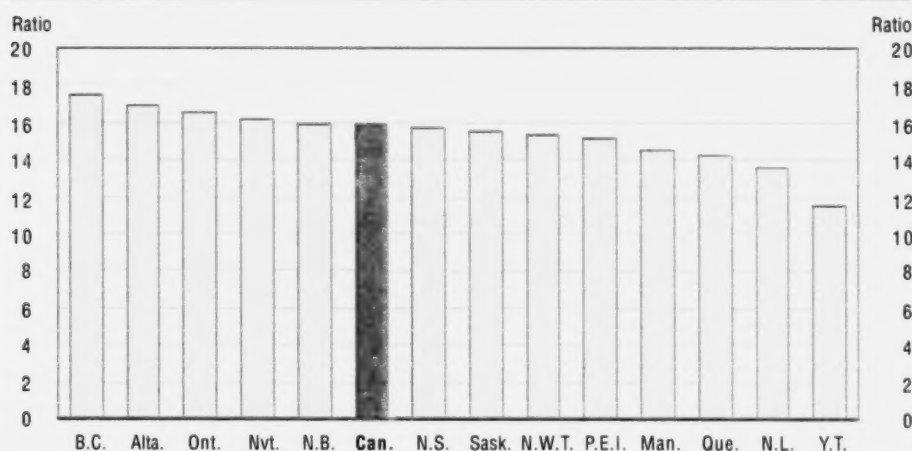

Between 1998/1999 and 2004/2005, the number of educators increased more than enrolments – or decreased less – in every jurisdiction, except for British Columbia.

The national student-educator ratio has declined each year over the last seven, decreasing 3.8% since 1998/1999. Only British Columbia increased their student-educator ratio by 1.8% (Table 10).

As a result, the student-educator ratio declined everywhere, except in British Columbia (Table 10). A decline in the student-educator ratio means fewer students per educator.

Chart 5

Student-educator ratio, Canada, provinces and territories, 2004/2005

The student-educator ratio must not be confused with class size. The former is much smaller because it accounts for the personnel outside the class (principals, counsellors or specialists) and teachers' time outside the classroom (for preparation and marking).

At the national level, in 2004/2005, there were 16 students for each educator. This ratio was higher than 16 for the provinces and territories of Ontario, Alberta, British Columbia and Nunavut.

The ratio was less than 15 students for each educator in Newfoundland and Labrador, Quebec, Manitoba and the Yukon (Chart 5 and Table 10).

5. Spending

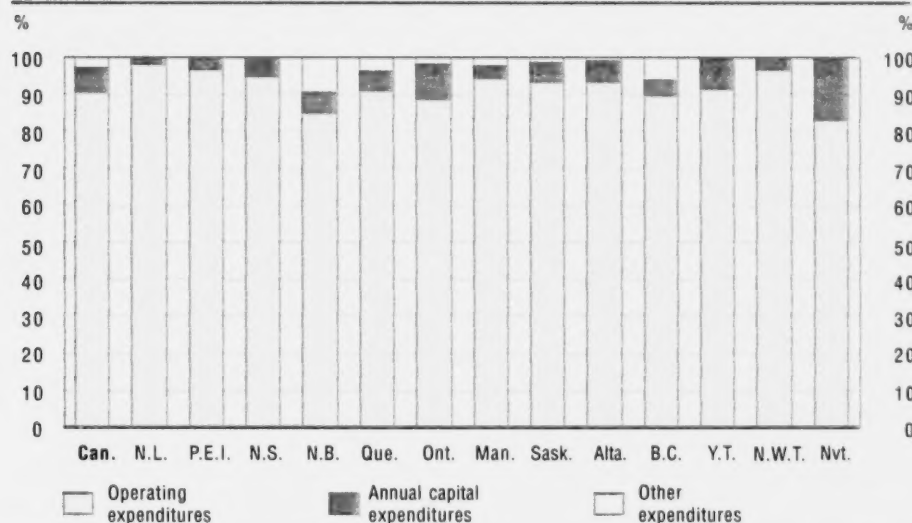

Total spending increased at a faster rate than inflation, as measured by the Consumer Price Index.

The total expenditures of public elementary and secondary schools in Canada rose by 24.6% in the past seven years, from \$35.7 billion in 1998/1999 to \$44.5 billion in 2004/2005 (Table 15). In comparison, inflation went up 15% during the same time frame (Table 32).

Nationwide in 2004/2005, operational expenses represented 90% of total expenditures, compared to 7% for annual capital expenditures. The other expenditures are mainly from interest on debt services (Chart 6 and Tables 13, 14 and 15).

Chart 6

Breakdown by type of expenditures, Canada, provinces and territories, 2004/2005

Note: Operating expenditures include salaries, wages and allowances, fringe benefits, teachers' pension plans and other operating expenditures. However, differences in the type of teachers' pension systems may affect the comparability between jurisdictions. In general, other expenditures include interest on debt services.

Operational expenses

In 1998/1999, operational expenses in the nation were \$32.1 billion (Table 13). Six years later, they reached \$40.2 billion, a 25% increase, compared to an inflation rate of 15% for the same period. It should be noted that more than half of operational expenses are directly linked to educators' salary expenses (Table 12).

From 1998/1999 to 2004/2005, the operational expenses of the provinces of Quebec, Manitoba, Saskatchewan and Alberta continued to grow.

Alberta had the highest increase in operational expenses between 1998/1999 and 2004/2005 at more than 45%, compared to Newfoundland and Labrador, whose increase was less than 14%.

Annual capital expenditures

Nationwide in 1998/1999, annual capital expenditures amounted to \$2.5 billion, compared to \$3.1 billion in 2004/2005, an increase of 23% (Table 14).

In 2000/2001, annual capital expenditures reached a high, with investments of \$3.1 billion, a 26% increase over 1998/1999. It should be noted that annual capital expenditures can vary upward or downward, depending on the types of investments made, as demonstrated by Nova Scotia (404%) in 2000/2001 and Saskatchewan (380%) in 2002/2003.

However, annual capital expenditures represented between 7% and 8% of total expenditures nationally, over the seven fiscal years examined by the study.

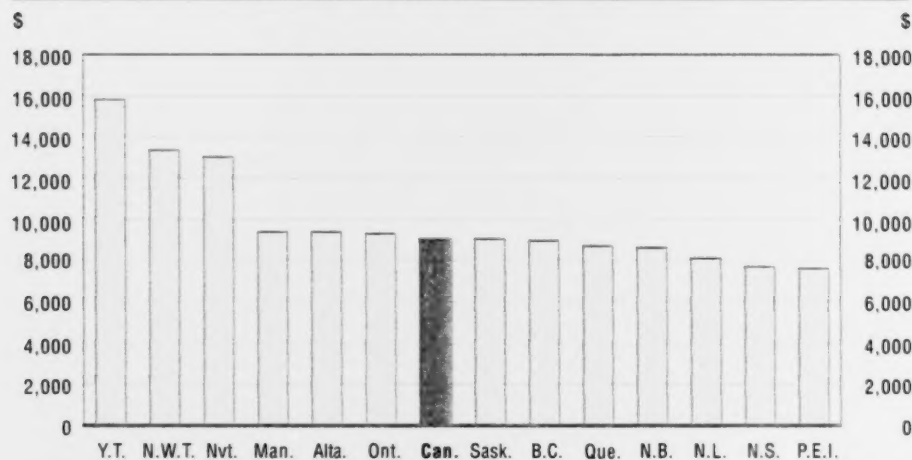

6. Total expenditures per student

Nationally in 1998/1999, total expenditures per student in public elementary and secondary schools amounted to \$7,077, in current dollars. Six years later, they reached \$9,040, representing an increase of 28% (Table 16a). In comparison, inflation went up 15% during the same time frame.

In 2004/2005, spending per student was close to \$16,000 in the Yukon and more than \$13,000 in the Northwest Territories and Nunavut (in current dollars). In the provinces, spending per student amounted to a maximum of more than \$9,200 in Manitoba, Alberta and Ontario, and a minimum of \$7,600 in Prince Edward Island (Chart 7 and Table 16a).

Chart 7

Total expenditures per student, 2004/2005 (in current dollars), Canada, provinces and territories

Note: Comparisons between jurisdictions should be made with care. Factors that influence total spending per student on education, such as the size of the school-age population, need to be taken into account.

From 1998/1999 to 2004/2005, in the majority of the provinces and territories, the total expenditures per student (in current dollars) rose more than twice as quickly as inflation. Ontario and British Columbia had the smallest differences between the total expenditures per student and inflation, at only 8% and 5% respectively (Tables 16a and 32).

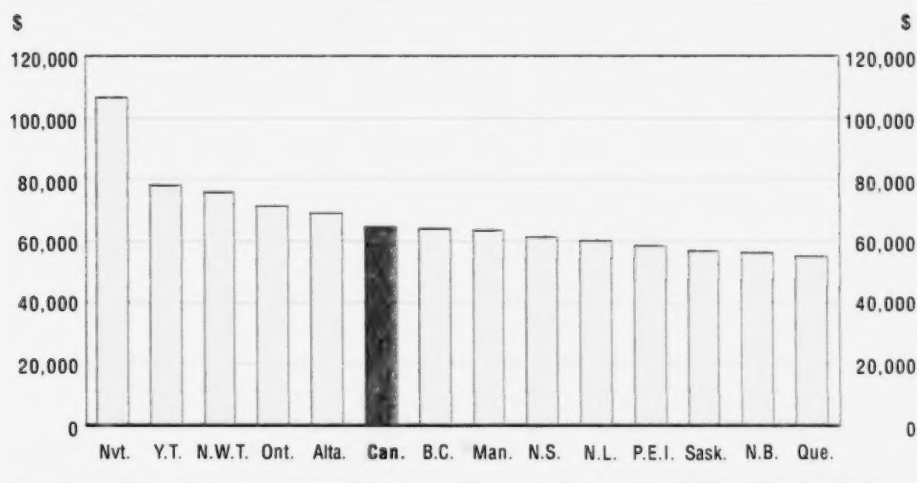

7. Average remuneration of educators

Between 1998/1999 and 2004/2005, average remuneration of educators (in current dollars) rose in all provinces and territories in Canada, except in British Columbia (-0.8%) and in the Yukon (-0.8%) in 1998/1999, Newfoundland and Labrador (-3.9%), Prince Edward Island (-5.9%) and British Columbia (-2.1%) in 1999/2000, New Brunswick (-0.8%) and in the Yukon (-1.7%) in 2000/2001 and in the Yukon (-1.4%) and Nunavut (-8.7%) in 2004/2005 (Table 11).

In 2004/2005, Quebec had the smallest gap between the average remuneration per full-time educators and full-year, full-time workers. The average remuneration for Quebec educators was \$55,207, compared to \$43,300 for full-year, full-time workers, a difference of \$11,907. Prince Edward Island was the jurisdiction with the largest gap between the average remuneration per full-time educator (\$58,412) and full-year, full-time workers (\$32,500). In all the other provinces, the average remuneration of educators exceeded the income of full-year, full-time workers by more than \$16,600 (Chart 8 and Tables 11 and 30).

Chart 8

Average remuneration per educator (in current dollars), Canada, provinces and territories, 2004/2005

In 2004/2005, in Ontario and Alberta, educators earned around \$70,000 on average, (in current dollars) and they were responsible for 17 students. In contrast, in Quebec, educators earned \$55,000 and were responsible for 14 students (Chart 8 and Tables 10 and 11).

In 2004/2005, educators in the three Territories earned the highest average remuneration, with Nunavut topping out at close to \$107,000. Educators in Nunavut were responsible for 16 students (Chart 8 and Tables 10 and 11).

Endnote

1. The term "educator" refers not only to teachers, but to all employees in the public school system who are required to have teaching certification as a condition of their employment. This definition generally includes principals, vice-principals and professional non-teaching staff such as education consultants, guidance counsellors and religious and pastoral counsellors.

... not applicable

1. See appendix for definitions. N.B., Que. and Man. (up to 2000/2001) include enrolments in adult programs and professional training under the authority of the school boards or districts. Certain jurisdictions include all students whether they are funded or not while others include only funded students.

2. Data exclude publicly funded hospital and provincial schools, care, treatment and correctional facilities.

3. Starting in 1999/2000, N.W.T. excludes Nvt.

1. See appendix for definitions. N.B., Que. and Man. (up to 2000/2001) include enrolments in adult programs and professional training under the authority of the school boards or districts. Certain jurisdictions include all students whether they are funded or not while others include only funded students.

2. Starting in 1999/2000, N.W.T. excludes Nvt.

3. Data exclude publicly funded hospital and provincial schools, care, treatment and correctional facilities.

* estimate

1. Operating expenditures include educators salaries, wages and allowances, fringe benefits, teachers' pension funds and other operating expenditures. Previously, teachers' pension funds were included only in total expenditures (Table 15). Please note that the type of pension systems may affect the comparability of the expenditures.

2. Starting in 1999/2000, N.W.T. excludes Nvt.

3. Starting in 2001/2002, data for Nunavut are available.

4. For Saskatchewan, data are subject to revision.

^{*} estimate

1. In N.S., annual capital expenditures in 2000/2001 include the result of the completion of 24 schools under Public Private Partnership (P3) agreements totaled \$241.2M.

2. In 2002/2003, Sask. has a significant increase in annual capital expenditures due to changes in reporting methodology.

3. Starting in 1999/2000, N.W.T. excludes Nvt.

4. Starting in 2001/2002, data for Nvt are available.

5. For Saskatchewan, data are subject to revision.

Appendix 1

Definitions

Enrolments

Number of students enrolled in public schools operated by school boards or the province in September (or as close as possible thereafter) of the school year. It includes all students in regular public schools (graded and ungraded), provincial reformatory or custodial schools, and other students recognized and funded by a province or territory. It excludes correspondence or distance education enrolments, private school students, independent school students or students in schools financed by federal departments (e.g. the Department of National Defense and the Department of Indian and Northern Affairs).

Includes other non-standard enrolment including students receiving educational services (if recognized by the province) and for schools and/or school districts that receive funding in a unique manner. They may be non-graduates who are taking only a few courses required to complete graduation. For example, a student who is enrolled in only 25% of a 'regular' course load and for whom the school or school district receives only 25% of the usual funding. This category may not apply to some provinces or territories.

Headcount enrolment

Defined as the number of students enrolled in September (or as close as possible thereafter) of the school year.

Full Time Equivalent (FTE) enrolment

Defined as the number of full-time students enrolled in September (or as close as possible thereafter) of the school year, plus the sum of part-time students according to the time fraction spent in the classroom and for which students are funded. For example, junior kindergarten and kindergarten students taking a half-time program and where a half-time program is being funded, the FTE enrolment would be the headcount enrolment divided by two, which is 0.5. If a student is only taking a quarter of the usual course load and is funded on that basis, the FTE enrolment would be the headcount enrolment divided by four, which is 0.25.

Graduates

Graduates of general training programs offered to similarly aged young students. Includes first time graduates only.

Includes graduates in General Education Development (GED), Adult Basic Education (ABE) and other equivalency programs. Excludes any graduates of upgrading programs offered at the postsecondary level.

Includes graduates in all professional and technical training programs. Excludes any graduates of vocational programs offered at the postsecondary level.

Educators

The educators include all employees in the public school system (either school-based or school district-based) who are required to have teaching certification as a condition of their employment. This definition generally includes teaching staff, principals, vice-principals and professional non-teaching staff which includes, among others, pedagogical consultants, guidance counselors and special education teachers.

It includes all educators in regular public schools, provincial reformatory or custodial schools, and other students recognized and funded by a province or territory. It excludes correspondence or distance programs, private schools or independent schools financed by federal departments (e.g. the Department of National Defense and the Department of Indian and Northern Affairs).

This definition excludes substitute/supply teachers, temporary replacement teachers, teachers on leave, student assistants and teaching assistants.

Please note that all teachers in regular programs for youth, adult upgrading programs and vocational programs for youth and adults are considered in this definition. Excludes any programs offered at the postsecondary level.

Headcount educator

Defined as the number of educators on September the 30th (or as close as possible thereafter) of the school year who are responsible for providing services to the **headcount enrolment** students.

Full Time Equivalent (FTE) educator

Defined as the number of full-time educators on September the 30th (or as close as possible thereafter) of the school year, plus the sum of part-time educators according to their percentage of a full-time employment allocation (determined by the province or territory). For example, if a normal full-time work allocation is ten months per year, an educator who works for six months of the year would be counted as 0.6 of a Full Time Equivalent (FTE) or an employee who works part time for ten months at 60% of full time would be 0.6 of an FTE.

Expenditures

These include all expenditures (operating and capital) paid directly by public school boards and districts or all expenses incurred by provincial or territorial Departments of Education directly on behalf of school boards in a given year. This also includes all public education expenditures incurred by other provincial departments or agencies, such as the Ministry of Finance and the Ministry of Transportation.

Includes expenditures related to Adult Upgrading programs such as General Education Development (GED), Adult Basic Education (ABE) and other equivalency programs. Also includes expenditures related to all professional and technical training programs.

The following are excluded:

- all expenditures from programs at the post-secondary level
- federal expenditures (e.g. schools operated by the Department of Indian and Northern Affairs or the Department of National Defense, federal programs such as Official Languages, Human Resources Development Canada programs, CIDA programs, Health and Welfare programs)
- expenditures for private schools
- intrasectoral transactions
- principal portion of debt repayments or bank loans
- recoveries of expenditures from specified purpose
- provision for vacation pay and similar employee benefit
- provision for bad debts and any other provisions
- reserves and other suspense accounts
- deficits and write-off to losses
- debenture discount
- taxes remitted to other government sub-sectors (ex: municipal taxes)

Educator Remuneration (Table 12) includes salaries, wages and allowances paid to educators for services rendered.

Includes principals, vice-principals and other professional non-teaching staff which includes, among others, pedagogical consultants, guidance counselors and special education teachers.

Allowances are payments made in addition to salaries and wages to compensate for isolation, additional administrative duties or other responsibilities and other similar costs. They include sick leave payments, maternity leave and other approved leave. Ad hoc allowances for travel and accommodation are excluded and are reported in "other operating expenditures". It excludes the employer's contribution to the pension plans and any other fringe benefits.

Operating expenditures (Table 13) includes educator remuneration and the following other expenditures:

- Fringe benefits which also include payment on behalf of the educator for unemployment insurance premiums, life insurance plans, health, dental and drug plans, vision care plans, workers' compensation plans, disability insurance plans, termination and early retirement gratuities, private use of institution's goods and services, employee discounts, professional development, payments to government work safety agencies, purchase and maintenance of clothing, moving fees, employee counseling services, union duties leave, annuity funds, paid recognition for years of service, paid holidays, trips, jury duty pay, employee parking lot fees, and board-sponsored recreation or paid memberships.
- Employer's contributions to Canada and Quebec pension plans.
- Teachers' Superannuation Pension Funds (current services) which include payments made to teachers on retirement during the current year **ONLY IF there are no employer's contributions to Canada and Quebec pension plans**. These payments may be made directly by the school boards or districts or by other provincial ministries and agencies responsible for teachers' superannuation pension funds.
- Teachers' Superannuation Pension Funds (unfunded liability) which are adjustments made during the current year to ensure that the funds required are available, which are actuarial liability adjustments made to current service payments to reduce or eliminate the debt. These adjustments may be made directly by the school boards or districts or by other provincial ministries and agencies responsible for teachers' superannuation pension fund payments.
- Other operating expenditures, which include salaries, wages and allowances for staff other than educators and salary and non salary costs related to business administration, instruction, educational services, food services, school facilities services, school transportation and any other expenditure related to the provision of services in the public school system.

Annual capital expenditures (Table 14) includes the following expenditures:

- Acquisitions of physical assets of a fixed or permanent nature with a useful life of more than one operating year. Include expenditures of an annual or cyclical nature for capital-lease and leasehold improvement (e.g. major repairs and upgrades to school and board buildings, new school and board furniture equipment and vehicles). Please note that expenditures for non-major repairs and maintenance designated as "plant operation" are reported under "other operating expenditures".
- Please note that all annual capital expenditures are reported with the **historical cost** in the year of the initial expenditure. If the capital expenditures are "amortized" during their useful life, they are converted to the historical cost and reported to the year of the initial cost in order to insure the comparability of data between provinces and territories.

Total Expenditures (Table 15) is the sum of the operating and annual capital expenditures and includes also the following:

- Debt services expenditures incurred to repay interest on loans used for capital purposes. Includes other interest expenses in respect of loans and advances, bonds, debentures and mortgages. Also includes other debt charges such as bank service charges and other charges pertaining to the servicing of the public debt.

Culture, Tourism and the Centre for Education Statistics Research Papers Cumulative index

Statistics Canada's **Division of Culture, Tourism and the Centre for Education Statistics** develops surveys, provides statistics and conducts research and analysis relevant to current issues in its three areas of responsibility.

The **Culture Statistics Program** creates and disseminates timely and comprehensive information on the culture sector in Canada. The program manages a dozen regular census surveys and databanks to produce data that support policy decision and program management requirements. Issues include the economic impact of culture, the consumption of culture goods and services, government, personal and corporate spending on culture, the culture labour market, and international trade of culture goods and services. Analysis is also published in *Focus on Culture* (87-004-XIE, free, <http://www.statcan.ca/bsolc/english/bsolc?catno=87-004-X>).

The **Tourism Statistics Program** provides information on domestic and international tourism. The program covers the Canadian Travel Survey and the International Travel Survey. Together, these surveys shed light on the volume and characteristics of trips and travellers to, from and within Canada.

The **Centre for Education Statistics** develops and delivers a comprehensive program of pan-Canadian education statistics and analysis in order to support policy decisions and program management, and to ensure that accurate and relevant information concerning education is available to the Canadian public and to other educational stakeholders. The Centre conducts fifteen institutional and over ten household education surveys. Analysis is also published in *Education Matters* (81-004-XIE, free, <http://www.statcan.ca/bsolc/english/bsolc?catno=81-004-X>), and in the *Analytical Studies Branch research paper series* (11F0019MIE, free, <http://www.statcan.ca/bsolc/english/bsolc?catno=11F0019M>).
